Description of Project Work:

This is an acquisition for multiple bridge, highway, and heavy civil construction services for the Oregon Department of Transportation in Clackamas, Oregon. The project consists of bridge widening, grading, drainage, paving, curb ramps, signage, illumination, signaling, ITS, and roadside development for I-205 from OR43 to OR213.

Potential Subcontractor & Supplier Work Scopes:

Grading, structural steel erection, guardrail/barrier, excavation, paving, erosion control, land clearing, noise/retaining wall construction, rebar supply/install, rip-rap placement, hydroseeding/weed control, guardrail, fencing, MOT, striping, painting/coatings, water quality monitoring/testing, CSL testing, quality control and testing, survey, demolition, saw cutting, core holes, borings, rebar supply/install, misc. metal supply/fabricate, fencing, drilled shafts/micro-pile, concrete supply, concrete pumping, electrical supply/install, signage furnish/install, trucking, and small tools and supplies supplier.

In order to assist certified small business subcontractors and suppliers, we will divide scopes of work into economically feasible units and will assist firms with meeting delivery schedules, providing points of contact regarding bonding, lines of credit, insurance and information to allow small businesses to secure their own equipment in order to maximize Small Business (SB) participation on this project.
